

FamiliLINK

A simple to use, single website to stay in touch with your more tech savvy family and friends, and receive care support if needed

- **Straightforward email system**
Have your own, easy to use FamiliLink email address; family & friends can use their own preferred email to stay in touch with you. Already using another email system? You can easily receive FamiliLink messages there or have your other email sent to FamiliLink.
- **Photos and videos in one location**
Photos and videos sent to you as email attachments or from other sites will automatically display...no need to follow confusing links, go to multiple websites or download anything.
- **Private calendar with reminders**
Your easy to use private calendar will show your daily schedule and remind you of important appointments, events, and daily medications. Others can easily update your calendar using their own online calendars.
- **Access your contacts**
Have at your fingertips the contact information of the people that matter most and see the weather at their location.
- **Support when needed**
You can have a trusted person be your Administrator/ Helper to assist you with FamiliLink.
